ACCESS SERVICE

2. General Regulations (Cont'd)2.4 Payment Arrangements (Cont'd)2.4.7 Ordering, Rating and Billing of Access Services Where More Than One Exchange Telephone Company or Rate Schedule is Involved

The billing method set forth in (A) following is applicable to interconnection arrangements between Exchange Telephone Companies involved in the provision of all Access Services.

In accordance with the Federal Communications Commission's Memorandum Opinion and Order in CC Docket No. 86-106, adopted July 20, 1987, the Company will adhere to the standards set forth in the Multiple Exchange Carrier Access Billing (MECAB) and the Multiple Exchange Carrier Ordering and Design (MECOD) Guidelines when providing access service under Multiple Telephone Company (Interconnection Point) Billing arrangements. Records exchange, rating and billing for Toll Free 8YY transit Traffic Service is subject to the provisions of the Multiple Exchange Carrier Access Billing Guidelines (MECAB). To the extent the Company jointly provided Toll Free 8YY Transit Traffic Service in conjunction with a third-party carrier that will bill interexchange Carrier Customers of that third-party carrier's switched access service, pursuant to that third-party carrier's tariff or other authority, for that third party carrier's portion of the total service, the Company and third-party carriers(s) will enter into a billing agreement with all billing carriers which is consistent with the provisions contained in MECAB. Toll Free 8YY Transit Traffic Service calls routed to an Incumbent Local Exchange Carrier's (ILEC) Tandem Switching facility will conform to the LATA restrictions as defined both in said ILEC's switched access tariff and in MECAB.

(N)

(N)

The Exchange Telephone Companies involved in providing the Access Service, will develop a mutually agreeable working arrangement to allow one of the Exchange Telephone Companies to perform "Access Service Coordination" (ASC) for all services requested.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.2 Rate Categories (Cont'd)(C) 900 Access Service Nonrecurring Charges

The 900 Access Service nonrecurring charge is assessed depending upon how the service is ordered:

- (1) If the service is ordered to only one end office performing six digit screening, the customer charge for the assembly of route tables is assessed for each end office subtending the access tandem. A second nonrecurring charge element applies per NXX activated or deactivated, times the designated Company end office(s) modified to perform six digit screening for 900 Access Service. This option can be applied repetitively to different tandems to customize the intended offering area.

The route pattern nonrecurring charge applies only once, on the customer's initial request to the Company for 900 Access Service for each end office

(D) Toll Free Database Access Service (TFDBAS)

The Toll Free Database Access Service (TFDBAS) Database Query Charge will apply for each TFDBAS query received at the Company's Toll Free SMS800 Database. Per query charges will be accumulated over a monthly period and billed to the customer on a monthly basis.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.2 Rate Categories (Cont'd)(E) Toll Free 8YY Transit Traffic Service

Toll Free 8YY Transit Traffic Service is an access service in which the company transports Toll Free traffic originated by a third party that is not an end user or other user of the Company's local exchange or exchange access service through its wire center to an Interexchange Carrier Customer. The connection can be either directly via a Direct Connect Facility from the company's switch to the IXC or indirectly via another LEC tandem switch.

(1) Direct Connect

This rate is in addition to the Toll Free Database Access Service described in Section 6.2.2. Toll Free Transit Service Direct Connect provides for the use of Tandem Switching; and appropriate portions of Tandem Switched Transmission, which includes Tandem Transport Termination (fixed) and Tandem Transport Mileage (per mile); Tandem Switching and Common Transport Multiplexing.

(2) Indirect Connect

This rate is in addition to the Toll Free Database Access Service described in Section 6.2.2. Toll Free Transit Service Indirect Connect provides for the use of Tandem Switched Transmission, which includes Tandem Transport Termination (fixed) and Tandem Transport Mileage (per mile); Tandem Switching and Common Transport Multiplexing.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.1 General (Cont'd)6.1.3 Ordering Options and Conditions

Switched Access Service is ordered under the Access Order provisions set forth in 5 preceding. Also, included in that section are other charges which may be associated with ordering Switched Access Service (e.g., Service Date Change Charges, etc.).

(M)

(M)

(M) Material now appearing on this page previously appeared on 1st Revised Page 6-11.

ACCESS SERVICE

6. Switched Access Service (Cont'd)6.2 Provision and Description of Switched Access Service Arrangements (Cont'd)6.2.2 Toll Free Database Access Service (TFDBAS) (Cont'd)(A) Description (Cont'd)

Unless prohibited by network considerations (e.g., different dialing plans), the customer's Toll Free Database Access Service (TFDBAS) traffic may, at the option of the customer, be combined in the same trunk group arrangement with the customer's non toll free database switched access traffic except as follows. Combining Toll Free Database Access Service traffic with the customer's direct routed switched access traffic will be allowed only when the end office is equipped to perform the toll free database query. When required by network considerations, a separate trunk group must be established for Toll Free Database Access Service. (C)

When Toll Free traffic is combined in the same trunk group arrangement with other traffic, usage for the Toll Free Database Access Service traffic will be aggregated with the other traffic for billing purposes. When separate trunk groups are provided for Toll Free Database Access Service, usage will be provided separately.

The Federal Communications Commission ("FCC") has concluded that hoarding, defined as the acquisition of more Toll Free numbers than one intends to use for the provision of Toll Free service, as well as the sale of Toll Free numbers by a private entity for a fee, is contrary to the public interest in the conservation of the scarce Toll Free number resource and contrary to the FCC's responsibility to promote the orderly use and allocation of Toll Free numbers.

ACCESS SERVICE
RATES AND CHARGES8. Rates and Charges (Cont'd)8.2 Switched Access Service8.2.1 Switched Transport - Entrance Facilities

(A) DS1

DS1 Switched Transport Entrance Facility is provided on an Individual Case Basis (per DS1) when an IXC is not co-located with the Sprint switch and will not exceed the competing ILEC rate for the same function. This element will be charged only in rare instances when an IXC directly connects with Sprint and is not co-located.

(B) DS3

DS3 Switched Transport Entrance Facility is provided on an Individual Case Basis (per DS3) when an IXC is not co-located with the Sprint switch and will not exceed the competing ILEC rate for the same function. This element will be charged only in rare instances when an IXC directly connects with Sprint and is not co-located.

8.2.2 Switched Transport - Direct-Trunked Transport

(A) DS1

DS1 Direct-Trunked Transport is provided on an Individual Case Basis (per DS1) when an IXC is not co-located with the Sprint switch and will not exceed the competing ILEC rate for the same function. This element will be charged only in rare instances when an IXC directly connects with Sprint and is not co-located.

(B) DS3

DS3 Direct-Trunked Transport is provided on an Individual Case Basis (per DS3) when an IXC is not co-located with the Sprint switch and will not exceed the competing ILEC rate for the same function. This element will be charged only in rare instances when an IXC directly connects with Sprint and is not co-located.
